TECHNICAL DATA SHEET

Product Name: **CHELAN SUPER**

General Information

CHELAN SUPER is a complete foliar fertilizer, rich in nitrogen, potassium, magnesium and sufficient quantities of assimilable trace elements: (B, Fe, Mn, Zn, Cu). The balanced proportion of these nutrients renders this product an essential supplement of soil fertilization and on the other hand, a powerful mean of confronting complicated deficiencies. Moreover, CHELAN SUPER strengthens growth and production. Its special method of production ensures a very high concentration of macro and trace elements in stable form. Apart from these, it contains regulating factors, which guarantee an ideal pH in spraying solutions.

Indications

Applications should be performed during the cool hours of day and immediately after the preparation of the spray solution. For greenhouses, lower rates are recommended.

Applications

General dosage:

Fertigation: 1-2 L/1000m²

Foliar: 200-300mL/100L of water.

Pit fruits: 1-3 applications overall. 1st application: 150-200 mL/100L of water, at the beginning of new vegetation. 2nd application: 250-300 mL/100L of water after 15-20 days.

Stone fruits: 1-3 applications overall. 1st application: 150-200 mL/100L of water, at the beginning of new vegetation. 2nd application: 200-300 mL/100L of water after the falling of petals.

Kiwi fruit: 2-3 applications overall. 1st application: 150 – 200 mL/100L of water at the beginning of new vegetation (4-6 new leaves). 2nd application: 200-300 mL/100L of water, 15-20 days later.

Vines: 2-3 applications overall. Foliar sprayings with 200-300 mL/100L of water each one, from the beginning of new vegetation to the falling of petals. (At the 1st application the smaller dose is recommended).

Horticultural: Foliar sprayings are practiced with 200-300 mL/100L of water, whenever deficiencies are present. Fertigation: 1-2 L/1000m².

Strawberry: Fertigation: 1-2 L/1000m².

Foliar: 200-300 mL/100L of water.

Precautions

General precautions, such as avoid contact with eyes and wash hands after use.

Packaging

Product is available in bottles of 0,5L / 1L / 5lt / 10L / 20L
