

Technical Data Sheet

PRODUCT: Microcare Mn

9th April 2013

General Information:

Microcare Mn is a water soluble fertilizer of manganese in chelate form. This form makes it practicable either by foliar applications or through irrigation water (fertigations). It is highly absorbable and compatible with other agrochemicals. Microcare Mn is applied as a powerful means in confronting deficiencies of manganese, providing this element both to the root system and vegetative growth, while it maximizes the qualitative characteristics of the yield.

Indications

It is suitable for all agricultural, horticultural and ornamental crops. Microcare Mn, is compatible with most fertilizers and agrochemicals.

Dosage - Application:

General dosage

Foliar: For foliar application do not exceed a concentration of 0,1% (100g/100L of water). In every case applications should be applied during the cooler hours of day.

Fertigation: 0.5–1.5 kg / 1000m², depending on crops necessities.

Precautions:

General precautions.

Keep away from children, do not eat, avoid contact with eyes and wash hands after use.

Packaging:

Product is available in
1 Kg cardboard boxes, 20 Kg buckets

QUARTER OF PERMANENT
